

INTERVENTION = FAIL

+ Contrary to the lies you have been told, the free-market did not fail. In fact, it was the exact opposite--government intervention proved once again that central-planning and artificially messing with markets is the real failure.

+ How so? The Government created the bubble by artificially trying to finance the housing market below levels that the free-market would have allowed with the Gov's GSEs (Government Sponsored Enterprises) of Fannie Mae and Freddie Mac.

+ What happens when government intervenes? EXACTLY what happened with the financial collapse! You see, the collapse would have never happened had the government not intervened in the first place! NO MORE INTERVENTION!!!
